# *Assignment 1*

## *Dataset Description*

1- Dataset source: Kaggle ,

<https://www.kaggle.com/datasets/akashdeepkuila/bakery?select=Bakery.csv>

2-The dataset belongs to "The Bread Basket" a bakery located in Edinburgh. The dataset provide the transaction details of customers who ordered different items from this bakery online during the time period from 30-10-2016 to 09-04-2017.

3-Number of rows and columns:

- Row=20507
- Columns=4

4- Description of features (columns)

- TransactionNo : unique identifier for every single transaction
- Items : items purchased
- DateTime : date and time stamp of the transactions
- Daypart : part of the day when a transaction is made (morning, afternoon, evening, night)
- DayType : classifies whether a transaction has been made in weekend or weekdays

5- Purpose of using this dataset:

Sales are always a good option in this context of EDA, and being a bakery, I found it enjoyable and interesting.
